## Curing Light : Model Led-680

### *Description:*

Yimei has just introduced LED-680, a state-of-the-art light-emitting diode (LED) curing light. Ideal for composites, adhesives and light-cured materials. This brand new generation, high-intensity universal light polymerization device is now built for efficiency.

**Performance + Affordability = Everything you're looking for is right in here**

### **Main Features:**

- Super-efficient 5-watt single lamp
- Fan-free and sealed construction allows for confident asepsis
- Standard autoclavable Light guide fiber with 360 rotation for easy access
- Protective eye shield
- The depth of curing is more than 3mm
- Wave length: 460nm-480nm
- 110V,230V,usable anywhere.European, North-American power plugs available.
